

Overview: "Pong Arcade," developed by the team "Pixel Paddlers" for Expogenix'24, is a contemporary rendition of the classic Pong game. It combines nostalgic gameplay with modern enhancements to offer a diverse gaming experience.

Key Features:

1. **Multiple Game Modes:** Enjoy traditional 2-player mode, single-player mode against an AI with adjustable difficulty, survival mode, and challenge mode with varying levels of complexity.
2. **Customization Options:** Personalize gameplay with adjustable paddle sizes, ball speed, and physics settings.
3. **Leaderboard Integration:** Track high scores across different game modes, promoting competition and engagement.
4. **User Interface and Experience:** Intuitive interface with retro-inspired graphics ensures accessibility and immersive gameplay.
5. **Technical Implementation:** Developed using Python and Pygame library, demonstrating proficiency in game programming and interactive design.
